

Which success plan is right **for me?**

The plans have been carefully crafted after more than 2,000 successful implementations.

The plans are designed to deliver value-driven activities to your organization from the start.

Our team will ensure you are quickly getting access to begin making the solution your own.

With our add-ons for Learn365, we increase awareness and consumption of learning through learner-centric tools and further reduces the workload for your admins with automation and enhanced analytics.

Preferred / Recommended

Success Premium

Get hands-on care from our delivery team who will support you in adapting your learning and performance programs for best practices.

The Ultimate Experience

Plan Details

- Installation and Setup
- Launch / Go Live Services
- Life Cycle Services

Installation and Setup

We are fully integrated within your Microsoft 365 tenant. To ensure a smooth installation it requires a few pre-requisites to be met. For a good reason – Security. We require the SharePoint Global Tenant Admin for any installation of Learn365. The installation and setup takes around 10-15 minutes for Learn365.

Installation and Setup	Success Basic	Success Plus	Success Premium
------------------------	---------------	--------------	-----------------

One time setup in your Microsoft 365 tenant

The entire installation (guided or self-installed) takes 10-15 minutes.

Guided installation: Clients can schedule a session for installation with our team. During that session, an engineer will guide your Global Tenant Administrator through the installation and core configuration, setting up the system.

Self-install: Our detailed installation guide includes a short video and detailed description guide to allow you to install the platform at your own pace and time. In case of questions during the installation, our support team is just a mouse click away to help you via our chat.

Setup

Clients can choose between guided session (with an engineer) or opt for a self-setup with our guide. The setup includes the creation of a course catalog, assigning permissions, enabling notifications.

The entire setup (guided or self-setup) takes 10-15 minutes for Learn365

Go Live Services

We understand that the human success journey will look different in every organization and our implementation plans allow for flexibility to meet your needs. A typical onboarding for a Learn365 is 4-12 weeks. A typical onboarding for Engage365 and Perform365 is 5-10 weeks.

Managed and un-managed Add-On solutions

Provided by Global Delivery / Professional Services Division we provide clients with solutions increasing awareness, consumption, effectiveness of training / administration and reporting. For details of each solution please visit our add-on solutions catalog (please see here).

Note: Add-On Solutions do not fall under the SaaS Agreement (please see here) related to availability, support or accessibility standards (please see here).

Add-On Solutions	Success Basic	Success Plus	Success Premium
Power Bi Solutions	✗	✔	✔

Our Power BI Solutions include pre-defined reports. Pre-built reports are ready to use with no or minimal adjustments. Learn365 Consultants will cover high-level questions related to Microsoft Power BI

SharePoint Custom Web Part Suite	✗	✔	✔
----------------------------------	---	---	---

Our SharePoint front-end web part suite can be placed on any SharePoint Page in the client tenant. They are designed to ensure increased awareness and consumption of training. The suite includes a unified catalog web part (accumulating courses from different catalogs), "My Learning", "Available Courses" and a "Search Training" web part. The web parts are installed by the client through their Global SharePoint Administrator and are highly configurable. We hope you enjoy them!

Learner External Certificate Uploader	✗	✔	✔
---------------------------------------	---	---	---

The Learner Certificate Uploader solution is a Power App/Power Automate combo that allows learners to self-upload their own certificates of completion. This solution should be used when you require learners to upload completion certificates within a learning module or outside of a course. When the solution is executed by a learner, they must enter course and completion information and upload a certificate file that will be sent to an approver for review and approval. When approved, the completion certificate will appear in the learner's transcript and Dashboard pages.

Training Plan Updater	✗	✔	✔
-----------------------	---	---	---

The Training Plan Updater solution is a Power App/Power Automate combo that allows administrators to select a training plan and mark all the completed users as "In Progress" for that training plan. This solution should be used when there are new courses constantly being added to a training plan and you require users to complete all courses within training plan. This solution will also enroll users into any newly added courses within the training plan.

Reporter	✗	✔ <small>Limited</small>	✔
----------	---	-----------------------------	---

Create Microsoft Excel or CSV reports based on enrollment, course, user, certificate data by using a data modeler. Include any of your extra AAD fields synced with Learn365 and schedule this reports to be automatically pulled and uploaded into your SharePoint environment.

Assigner	✗	✔	✔
----------	---	---	---

Automatically manage and maintain (Azure Active Directory) AAD groups by creating them, adding and removing learners dynamically to groups, based on user profile metadata (e.g. Department, City, Manager, etc.) and learning data (e.g. previous enrollments in other courses, certificate status, etc.) further increasing automation, accuracy and speed. A new level of independence from IT while fully in line with your IT security and process guidance.

Synchronizer	✗	✔	✔
--------------	---	---	---

Beside the fields automatically synced from AAD, you can synchronize extra account metadata fields (including any of the 16 extension attributes from your Azure Active Directory (AAD). Example: Sync the employee ID number, or the Cost Center location, etc.

On-Demand Services for Learn365

Clients plan ahead for tasks like “Bulk Import Completion Records” or “Course Cloning” and work with our consulting team to get the job done!

On-Demand Services

Success Basic

Success Plus

Success Premium

Bulk Import Completion Records

Request the import of completion records. All we need is an excel file (we provide the template) with accurate data and we will import these records for you.

For Success Plus clients the service is limited to up to 1 initial import, typically to import existing historical records. For Success Premium clients the service is limited to up to 1 request per quarter

Content Provider Course Services

Our content provider course services are here to provide you with off-the-shelf content so you can test drive with new providers. The courses are deployed to your Learn365 tenant by our consultants or with our partners in your region.

Content Provider Course Services

Success Basic
