

# Construction Essentials

Whether in the office or onsite, safely execute training for employees on the latest compliance or upskilling courses, such as working at heights, scaffold safety, addressing harassment in construction, and leadership training.

Based on our 156M completed courses in 2023, time management, communications, conflict mediation, and resilience are some of the most important skills in the Construction industry.

## Compliance

**Adhere to environmental, safety, and employment regulations, no matter where your team works from.** Offering industry-relevant compliance training that can be completed via desktop or mobile, you'll find training on topics like working at heights, scaffold safety, rigging and cranes, as well as workplace safety topics for issues like sexual harassment in construction.

## Upskilling

**Elevate construction projects to new heights with an empowered team that has more than just the essential skills.** With Go1's diverse content library, your workforce can access a personalized upskilling journey, delivered in the way they prefer to learn. Our library ensures a wide range of topic coverage, length, languages, and interactive learning formats, allowing your employees to improve their skills when and how it suits them best.

- **For your office staff:** BIM and construction software education, construction project management.
- **For your leadership team:** Communications, timeline management, budget management.
- **For your design team:** Principles of design- build, introduction to robotics, LEED (leadership in energy and environmental design), CDM (Construction design and management).
- **For your construction staff:** Hand tool safety, operating heavy machinery, construction mental health, construction dust safety.
