

# Technology Essentials

Whether you're focused on software, hardware, cloud security, or e-commerce, empower your workforce to drive innovation, foster agility, and stay on top of the latest tech and security skills.

**71% of Technology Companies are focused on developing AI and cloud computing skills for their tech teams. That's 20% higher than other industries.**

Compliance

**Prioritize security and privacy** through compliance training that mitigates future risks and threats. Whether you're looking for security compliance like MFA, data privacy training like GDPR, or cybersecurity training like phishing attacks, Go1's content library can help prepare your staff.

Upskilling

**Invest in talent development with the latest technology courses** on programming, data science, AI, cloud computing, and many more to be a recognized leader across the technology industry.

- **For your product team:** Product strategy and road mapping, market research, customer feedback, product lifecycle management, scrum fundamentals
- **For your engineering team:** Interactive sandbox environments to learn topics HTML, JavaScript, Java, cloud training for AWS, Azure, Google Cloud
- **For your data team:** Python, data driven decision making, R, data visualization in Tableau, SQL, Excel

Cert Prep & CPD

**Take employee skills to the next level with certification prep courses.** Technical teams can keep their skills current and prepare for certifications with Go1's 90+ certification prep courses in topics like:

- **Project Management:** Project Management Professional (PmP) certification prep
- **IT:** Cisco Certified Network Professional and CompTIA Network and Security certification prep, CPD from National Cyber Security Centre
- **Cloud:** AWS Certified Cloud Practitioner, Microsoft Azure Administrator, Google Cloud Architect certification prep

**Challenge** Create a learning program to develop multilingual leaders

**Solution** A multilingual learning program powering leadership development in both English and French

**Results** An increase in employee engagement, motivation and confidence that promotes continuous learning beyond current job roles.

# Paving the way for leaders with Go1

When KPrime Technologies needed to create a structured L&D system for their rapidly growing organization, Go1 provided a solution.

## The KPrime Technologies and Go1 partnership

1. Go1 has enabled KPrime Technologies to efficiently and effectively train 120 new employees in a single onboarding group.
2. Go1's diverse range of learning content inspired KPrime Technologies to expand their learning offerings to leadership.
3. Go1 facilitated cost savings while delivering high-quality training that increased employee engagement, motivation and confidence.

**"A leadership course alone would be \$3k/person and we just did that with 53 people utilizing Go1 for a single assess cost."**

Isabela de la Rosa – Training Program Manager

## The need for training

Before implementing Go1, Isabela and her team relied on manual training methods for onboarding new hires both in-person and virtually. They lacked a structured L&D system and the in-house expertise to curate and assign appropriate training content to teams, which posed significant challenges, particularly when dealing with a large influx of new employees.

## Enhancing leadership development

KPrime Technologies leverages Go1 content to build out their prerequisite leadership training program that helps to prepare leaders for in-person session, allowing the team to focus on what matters most in their virtual live trainings. To date, the team has had 53 leaders complete the training. Leaders say they now walk into the virtual sessions feeling more confident and prepared.
